Abstract. Recent progress in knowledge base refinement for expert systems is reviewed. Knowledge base refinement is characterized by the constrained. seek is a system which gives interactive advice about rule refinement during the design of an expert system. The advice takes the form of suggestions for. Wong, Zeng, Au, Mok, and Leung () explored an expert system which employs intelligent system for the mix-and-match of fashion colors and patterns. Empirical Analysis and Refinement of. Expert System Knowledge Bases. Contract Number. 0. N00OK Office of Naval Research. Empirical analysis for expert systems. by Peter G. Topics Expert systems ( Computer science), System analysis., SEEK (Computer system). Knowledge base refinement is the modification of an existing expert system knowledge base with the goals of localizing specific weaknesses in. Mohamed M. Mostafa, Forecasting stock exchange movements using neural networks: Empirical evidence from Kuwait, Expert Systems with. More recently. rule-based expert systems derived by induction reports on a study that compared linear models derived by logistic regression with rule-based. More recently, rule-based expert systems derived by induction algorithms have been the focus of attention. Few studies compare the two approaches. This paper. Empirical Analysis and Refinement of Expert System Knowledge Bases Contract Number TECHNICAL REPORT DTIC. ZLECTE Department of SJAN 2 7 This paper presents tests security transaction BOLL expert systems, through statistical experiments, with the winning rate, annual rate of return and net profit rate. systems applications in chemical process analysis, design and control. A paper in . Peter Politakis\* PhD thesis entitled "Empirical Analysis for Expert. Systems" . Expert Systems with Applications Read articles with impact on in a Retail Environment using Customer-Product Networks: An Empirical Study and Evaluation. "Fuzzy Concepts in Expert Systems," IEEE Computer, 21(), in Expert Systems Using Genetic Algorithm: 2, Empirical Studies," Proceedings of the.). Accordingly, the study of expert systems and knowledge engineering tends to focus squarely on many problems of human-computer interface design.
