

The Challenging Child: Understanding, Raising, And Enjoying The Five difficult Types Of Children

Parenting/Child Care

Copyrighted Material

Most children fall into five basic personality types that stem from inborn physical characteristics: sensitive, self-absorbed, defiant, inattentive, or active/aggressive. For each of these, there are parenting patterns to avoid and those that help the most. *The Challenging Child* reassures parents that they do not simply have to "live with" their child's temperament but can fit their parenting style to their child's unique personality and help each child build on strengths, master weaknesses, and embrace life with confidence and skills.

"Brims with suggestions for helping kids compensate for weaknesses."
—*The Washington Post*

"Invaluable developmental insight and hands-on advice."
—*Child Magazine*

"A rope with a life preserver at the end."
—*Publishers Weekly*

Stanley I. Greenspan, M.D. ("One of the leading child psychiatrists of our time"—T. Berry Brazelton, M.D.), is Clinical Professor of Psychiatry, Behavioral Sciences, and Pediatrics at the George Washington University Medical School and the author of *First Feelings*, *Playground Politics*, *Infancy and Early Childhood*, and many other scholarly and popular books.

Jacqueline Salmon is an editor at *The Washington Post*.
